DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemmons (US Patent No. 6,481,011B1) in view of Herz et al. (US Patent No. 6,020,883).

Regarding claim 1, Lemmons discloses a user interface for a recommender system, the user interface comprising a display screen having:

Art Unit: 2173

a first region for displaying a rating derived from a previously defined preference profile contained in the recommender system (see col. 6, lines 3-56); and a second region displaying preference settings in the profile which were used to derive the rating (see col. 7, lines 23-53); however, Lemmons fails to explicitly teach wherein the preference settings can be changed if the rating derived by the profile is incorrect.

Herz teaches wherein the preference settings can be changed if the rating derived by the profile is incorrect (see col. 13, lines 53-67). It would have been obvious to one of an ordinary skill in the art at the time the invention was made to provide wherein the preference settings can be changed if the rating derived by the profile is incorrect as taught by Herz to the interactive program guide user's interests in order to provide a program guide system which a user may set up a profile based on various preference attributes indicative of a user's interests.

Regarding claim 2, Lemmons discloses wherein the profile is an explicit-based preference profile (see col. 7, lines 53-67).

Regarding claim 3, Lemmons discloses wherein the profile is an implicit-based preference profile (see col. 8, lines 6-51).

Regarding claim 4, Lemmons discloses comprising a third region for displaying a rating derived from a previously defined second profile contained in the recommender system (see col. 9, lines 1-65).

Art Unit: 2173

Regarding claims 5 and 6, Lemmons discloses wherein the profile is an explicit-based preference profile and the second profile is an implicit-based preference profile (see col. 10, lines 9-67).

Regarding claim 7, Herz discloses wherein the preference settings displayed in the fourth region can be changed if the rating derived by the profile is incorrect (see col. 15, lines 10-65).

Regarding claims 8 and 9, Lemmons discloses wherein the second region further enables features to be added to the profile; and wherein the recommender comprises a television show recommender and the preference profile comprises a television show viewing preference profile (see col. 11, lines 11-67).

Claim 10 differ from claim 1 in that "displaying a rating derived from the previously defined preference profile; displaying preference settings in the profile which were used to derive the rating; and enabling the user to change at least one of the preference settings if the rating derived by the profile is incorrect" which broadly read on Herz (see col. 15, lines 45-65 and col. 17, lines 19, lines 43-64).

As claims 11-27 are analyzed as previously discussed with respect to claims 1- 10 above.
